Announcement:
Volunteer opportunities are available for students interested in exploring the population dynamics of Douglas-fir Beetle and western spruce budworm across Washington.

Project Description & Duties:
We will be evaluating the natural enemy communities interacting with Douglas-fir beetle and western spruce budworm across the Washington Cascade Range. The selected students will have the opportunity to gain experience using microscopes, identifying insects, and sampling in field and lab based settings.

Schedule and time commitment:
The work is lab and field (if desired) based, a schedule will be discussed upon hire.

Requirements:
No experience necessary, however, a background and interest in biology, entomology, or a related discipline is preferred.

How to Apply: Send an email of interest and resume to: Alex Pane, apanewu.edu | UW School of Environmental and Forest Sciences
