The Workforce Development Program is offering 8 candidates the opportunity to work on projects and programs in our planning, engineering, project management, project control, and construction management units.

This program provides recruitment, mentorship, training, placement, and retention services for entry-level candidates who are building their skillset or are new to the water sector. Candidates belong to a cohort that receives extensive onboarding, participates in tours and site visits, and is given challenging assignments while exploring our different work groups. Our goal is to help participants find their passion and place in our agency while we support their continued career growth.

We have a high success rate placing participants in full-time permanent positions within 6-12 months.

Additional details:

*Must have a college degree or 1-2 years of work experience in a related field.
*Two-year temporary positions.
*Applicants who have previously applied to King County Wastewater Treatment positions are encouraged to apply.
*Must live in Washington state.
